MY TRAVEL RULES

If your players actually want to be able to map Wir-Heal, use the rules below:

1. Describe where the players just came from: "You are walking away from Nest Town". Write down the location on the map.
2. Roll a d6 on first column, describe the path.
3. Draw a line from the current location, and label that path. "Cracked Concrete".
4. Roll a d6 on the second column, describe the path, draw a line, and label it.
5. The PCs can then:
 - Choose one of the two paths to explore. If they do this, describe them arriving at the new location, and add it to the map.
 - Spend d4 hours to find another 2 paths. Do steps 1-4 again.
 - Go back the way they came.

The important thing is that PCs can always go back the way they came. New paths will spiral, shortcuts appear, and things will still be nonsense. (how can a place lead back to itself?)

But it CAN be mapped!
